Main Features

- Fully responsive - will adapt to any device.
- Separate settings per breakpoint.
- Gallery mode to create an image slideshow with thumbnails
- Supports swipe and mouseDrag
- Add or remove slides dynamically.
- Small file size, fully themed, simple to implement.

- CSS transitions with jQuery fallback.
- Full callback API and public methods.
- Auto play and infinite loop to create a content carousel.
- Keyboard, arrows and dots navigation.
- Chrome, Safari, Firefox, Opera, IE7+, IOS, Android, windows phone.
- Slide and Fade Effects.
- Auto width, Vertical Slide, Adaptiveheight, Rtl support...
- Multiple instances on one page.
- Slide anything (youtube, vimeo , google map ...)

How to use lightSlider?

The Code

add the Following code to the <head> of your document.

```
1. 1. <link type="text/css" rel="stylesheet" href="css/lightslider.css" />
2. 2. <script
   src="//ajax.googleapis.com/ajax/libs/jquery/1.11.0/jquery.min.js">
   </script>
3. 3. <script src="js/lightslider.js"></script>
4. 4. // Do not include both lightslider.js and lightslider.min.js
```

HTML Structure

```
1. 1. <ul id="lightSlider">
2.   <li>
3.     <h3>First Slide</h3>
4.     <p>Lorem ipsum Cupidatat quis pariatur anim.</p>
5.   </li>
6.   <li>
7.     <h3>Second Slide</h3>
8.     <p>Lorem ipsum Excepteur amet adipisicing fugiat velit nisi.
9.   </p>
10.  </li>
11.  ...
12. </ul>
```

Call lightSlider!

```
1. 1. <script type="text/javascript">
